

GET TO KNOW MESKELO

The kindness and attention of a nurse who helped him battle a serious illness at the age of only ten inspired Meskelo to become one himself. “Before he gave me an injection, he let me play with the syringe,” he recalls, “and I knew I had to be one of those who helps people who are very sick and frail.” With AgeRight, he’s a patient advocate in senior care facilities, where his responsibilities include assessing the health needs of older adults, helping manage transitions between care settings and providing education and support

“The most significant reward is in hearing patients’ stories, and making a difference in the lives of those I serve”

LESLIE AT-A-GLANCE:

- Bachelor of Science in Nursing (BSN) degree from Indiana State University
- Master of Science in Nursing (MSN) degree from Walden University
