

### GET TO KNOW MILLIE

When Millie was a child, in a clear foreshadowing of her eventual career, her favorite toy was a Minnie Mouse doctor kit. She started as a nursing assistant in a variety of settings, where she experienced the rewards of providing hands-on care when her patients were at their most vulnerable. She pursued additional training to create more opportunities for impact, and calls her decision to be a physician assistant “the best choice I ever made.” At AgeRight, Millie manages chronic and acute illnesses in skilled nursing and assisted living facilities, making sure each patient’s goals of care are met.

“It’s so rewarding to get to know the residents, and foster mutual respect with one another.”

### MILLIE AT-A-GLANCE:

- Master of Science in Physician Assistant Studies from Long Island University Brooklyn
- Experience in home care, skilled nursing, emergency and neurosurgery settings
- Enjoys trying new restaurants, hiking, rafting, camping, surfing and hanging out with her bull terrier puppy, Maui
